

Get set of Ids from your SObject list without iteration

You don't need to iterate through the list of SObjects to get the set of their Ids:

```
Set<Id> leadsIds = new Set<Id>();  
for(Lead l : leads) {  
    leadsIds.add(l.Id);  
}
```

You can simply cast your List to Map and then use keyset:

```
Set<Id> leadsIds = (new Map<Id, Lead>(leads)).keySet();
```

Get set of Ids from your SObject list without iteration

You can also do that directly on SOQL query result:

```
Set<Id> leadsIds = new Map<Id, Lead>([  
    SELECT Id FROM Lead LIMIT 10  
]).keySet();
```
